SUMMARY

Java Backend Developer with hands-on experience delivering Spring Boot REST APIs and AEM components in production environments at Bajaj Finserv Direct Limited and Software Scope Technology. Proficient in Hibernate/JPA, MySQL optimization, Java, Git, and Maven — with a track record of writing clean, scalable backend code in fast-paced Agile teams. Passionate about building reliable, high-performance systems and growing within an engineering-driven product organization.

TECHNICAL SKILLS

Languages: Java 8/17, OOP, Collections Framework, Multithreading, Exception Handling, Streams & Lambdas

Backend / API: Spring Boot, Spring MVC, RESTful APIs, Hibernate, JDBC, Microservices

Frontend: HTML5, CSS3, JSP, JavaScript (basic)

Database: MySQL — Joins, Indexing, Query Optimization, CRUD, Normalization (3NF)

CMS & Enterprise: Adobe Experience Manager (6.x), Sling Models, OSGi Services, Adobe Journey Optimizer, Adobe Target

DevTools: GitHub, Maven, Postman (API Testing), IntelliJ IDEA, VS Code

EXPERIENCE

Java Backend Developer — Bajaj Finserv Direct Limited, Pune

Jun 2025 – Present

- Built 8+ custom AEM components using Sling Models and HTL (Sightly), reducing content-author effort by ~30% through reusable template structures.
- Configured OSGi services and Sling workflows to automate content publishing across 4 pipelines, eliminating repetitive manual deployment steps.
- Integrated Adobe Journey Optimizer and Adobe Target across 3 campaign workflows, improving audience targeting and Personalization accuracy.
- Collaborated in 2-week Agile sprints: conducted peer code reviews, maintained clean Git branching strategy with zero merge conflicts, and documented component APIs.

Java Backend Developer Intern — Software Scope Technology, Pune

Jan 2025 – May 2025

- Built 5+ RESTful APIs using Spring Boot following the Controller–Service–Repository (MVC) architecture, supporting end-to-end core business workflows with clean separation of concerns.
- Implemented Hibernate (JPA) persistence layer with MySQL, reliably handling 10,000+ records via CRUD operations, transaction management, and cascading relationships.
- Optimized 8+ SQL queries through strategic indexing and join restructuring, reducing average data-retrieval time by ~15%, and improving overall API response speed.

PROJECTS

Smart Hospital Management System | Java, Spring Boot, MySQL, JavaScript, HTML/CSS

- Developed RESTful APIs for 3 core modules (patient management, appointment scheduling, billing) serving 4 distinct user roles with role-based access control via Spring Security basics.
- Designed a fully normalized MySQL schema (3NF) with 12+ endpoints supporting concurrent access for patients, doctors, and administrative staff without data integrity issues.
- Reduced average SQL query response time by ~20% using indexing, structured exception handling, and input validation; implemented comprehensive server-side error response

Cosmic Energy – Mental Health App | Java, Spring Boot, MySQL, JavaScript, HTML/CSS

- Built REST APIs tracking 6 daily health metrics per user, generating personalized wellness recommendations through a backend scoring and rules engine.
- Architected a normalized MySQL schema with role-based access control for 3 user types (admin, therapist, user), ensuring secure and isolated data handling.

EDUCATION

Bachelor of Technology – Computer Science Engineering

Aug 2021 – Aug 2025

MIT World Peace University (MIT-WPU), Pune | CGPA: 7.32 / 10

CERTIFICATIONS

- Adobe Experience Manager (AEM) Sites – Adobe (2025)
- Adobe Journey Optimizer & Adobe Target – Adobe (2025)
- Java Full Stack Developer – Exponent IT (2026)
